## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or disclose the claimed limitation of a flash control device switchable between a discrete and FP flash mode in which a calculating part for calculating a proper flash intensity in accordance with the object distance and an f-number, a sensitivity, and an exposure time of a camera when the electronic flash device is in the FP flash mode, and for calculating the proper flash intensity in accordance with the object distance, the f-number, and the sensitivity when the electronic flash device is in the discrete flash mode, the proper flash intensity being a degree of intensity necessary for illuminating an object with a proper light amount; and an emission control part for instructing the electronic flash device to flash with the proper flash intensity, wherein flash control is performed so that the object is illuminated with the proper exposure amount.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matsui (US 6512891 B2) shows the general state of the art.
